**GLIDE INTO SOMETHING COOL AND SPACIOUS**  
**Marvel Unveils All-New Refrigerated Drawers; Including World's Only 30-Inch Wide Model**

RICHMOND, Ind., May 10, 2005—Continuing its tradition of re-defining style and industry trends, MARVEL is proud to announce the latest additions to its famed lineup --- whisper-quiet undercounter *Refrigerated Drawers* to grace any kitchen or room in the home. Expanding MARVEL's trend towards "bigger, better and more elegant," this new line includes the world's first refrigerated drawer measuring a stunning 30 inches across, providing homeowners the freedom to entertain like never before.

The two new MARVEL undercounter *Refrigerated Drawer* models are the *60RD* and the *80RD*; the former is 24 inches wide in a six cubic-foot cabinet and the latter is a stunning 30 inches across, in a 7.7 cubic-foot cabinet. Both feature a top and bottom glide-out drawer on telescoping slides for full extension and easy access. The models may be built in to surrounding cabinetry and boast the easiest overlay assembly on the market today. The exterior cabinets are also fully finished, so that each model may also be used in stand-alone applications. The models are available in white, black, stainless and full overlay.

The MARVEL *Refrigerated Drawers* feature 304 stainless steel drawer interiors that provide elegance and durability. Each drawer is available with MARVEL's exclusive European-style Gastronorm Storage System, which combines popular-sized stainless steel containers and clear lids for easy subdivision of the upper and lower drawers, as well as stylish, practical food storage. Both models have a full-depth bottom drawer with unobstructed storage, meaning that these are the only refrigerated drawers on the market today that can store a two-liter bottle or opened wine bottle vertically.

Both models feature full automatic defrost, as well as a discreet electronic keypad/LED temperature display (ensuring precise temperature control for refrigerated items) that is hidden when the drawers are closed. Each model also boasts clean, bright, low-voltage interior lighting that ingeniously projects light downward at the drawer's interior, even when the drawer is completely opened.

MARVEL is a leading manufacturer of luxury undercounter refrigeration products, including refrigerated drawers, wine cellars, beverage and wine refrigerators, outdoor refrigerators, ice machines, beer dispensers and more. For complete information about the new *Refrigerated Drawers*, contact MARVEL, an Aga Company, at (800) 428-6644, or visit [www.lifeluxurymarvel.com](http://www.lifeluxurymarvel.com).
